Digital Literacy Project Report

Name: Prakhar Anand

Reg No: 25BAI11000

Branch: B.Tech

Year: 1st Year

Course Code: CSE0001

Date: 23 MARCH 2026

Introduction

The primary focus of this project is on digital literacy and its importance for students in our current world, which is very technological. The project has been developed as a way to help Students Digital Ambassadors explore digital tools, build an online professional profile, and understand how to act safely and responsibly while being online. This project includes several types of activities such as producing an infographic, a digital portfolio, and learning about coding through different platforms, as well as creating a professional email. Also, I had the opportunity to learn about different types of cybercrime and many more. By being part of this project, I had the chance to learn how to navigate and use the following platforms: GitHub, LinkedIn, Google Forms, etc., and how those platforms improved my ability to communicate as a student in a technologically advanced world.

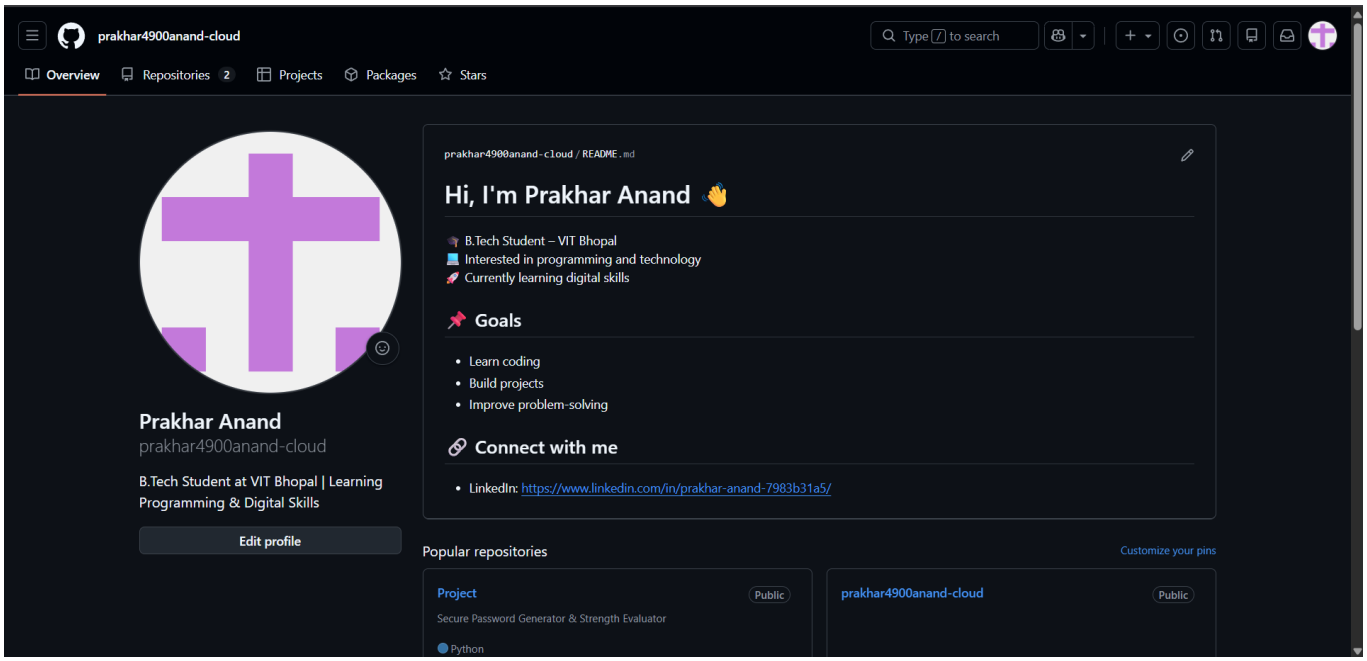
Digital Literacy Awareness Infographic - Task 1

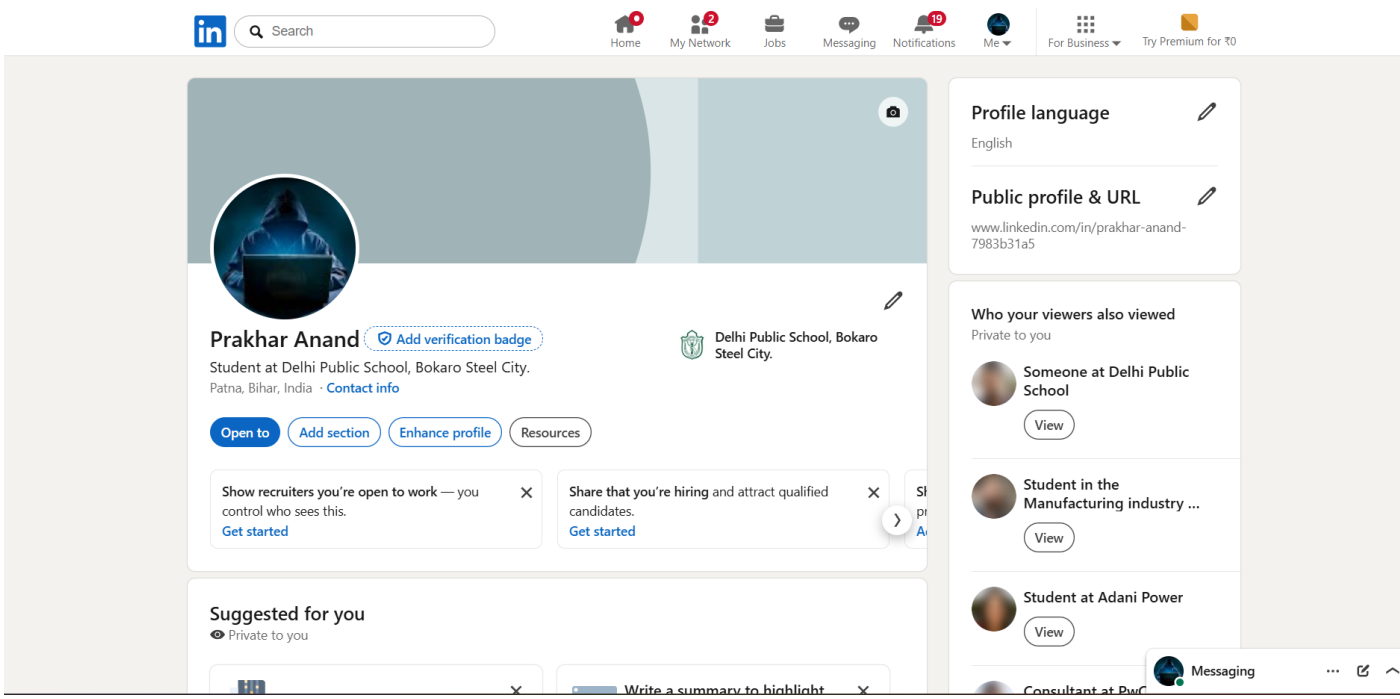
I created a digital literacy awareness infographic through Canva. This infographic includes various topics including Safe Practices When Using The Internet, Digital tools for students And Creating An Online Professional Presence. Various Icons, Colors, And Simple Text Were Used To Create A Visually Appealing Design That Is Easy To Understand. The Purpose Of The Infographic Is To Educate Students About Responsible Internet Usage. While Working On This Infographic, I Found It Interesting To Use Available Templates And Then Customize Them To Meet My Needs; However, Finding A Suitable Layout For The Layout And Sizing Of Text And Graphics Was Slightly Challenging.

Through this assignment, I was able to learn how to visually communicate ideas using the most straightforward method; I also realised just how important it is to promote digital literacy with students.

Task 2 (Portfolio)

Listed below are some of the major aspects of creating your profile on GitHub and LinkedIn to establish a professional digital presence. GitHub serves as an online repository for code and coding projects to enable individuals to store, manage, and showcase their coding work. LinkedIn is used to share your professional accomplishments, connect with other professionals in your field, and build your professional network. I filled out basic information about myself, including education and areas of interest, to create a complete and professional profile on both platforms. By using GitHub and LinkedIn regularly, I will be able to share my completed projects, improve my skills, and establish connections with other professionals. Over the next four years, I plan to update my GitHub frequently with new projects, as well as to use LinkedIn to find internship and job opportunities. This experience has taught me how important it is to create and maintain a strong, professional online identity.

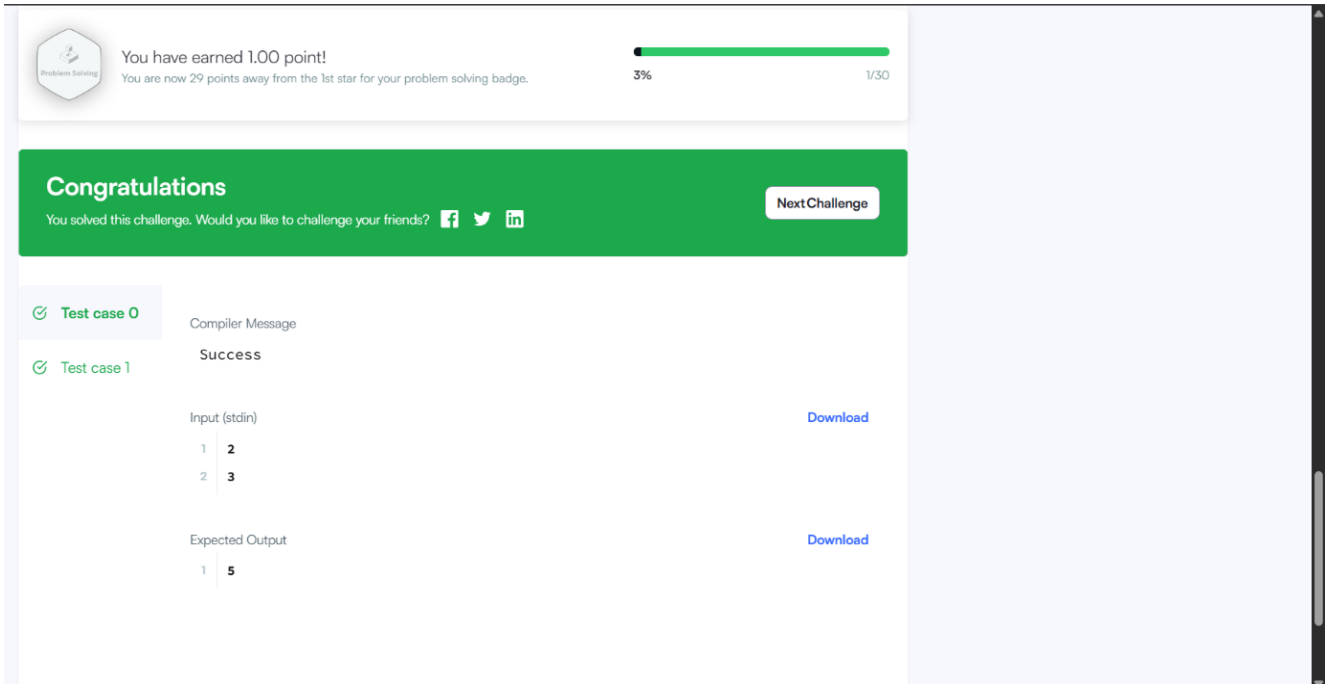


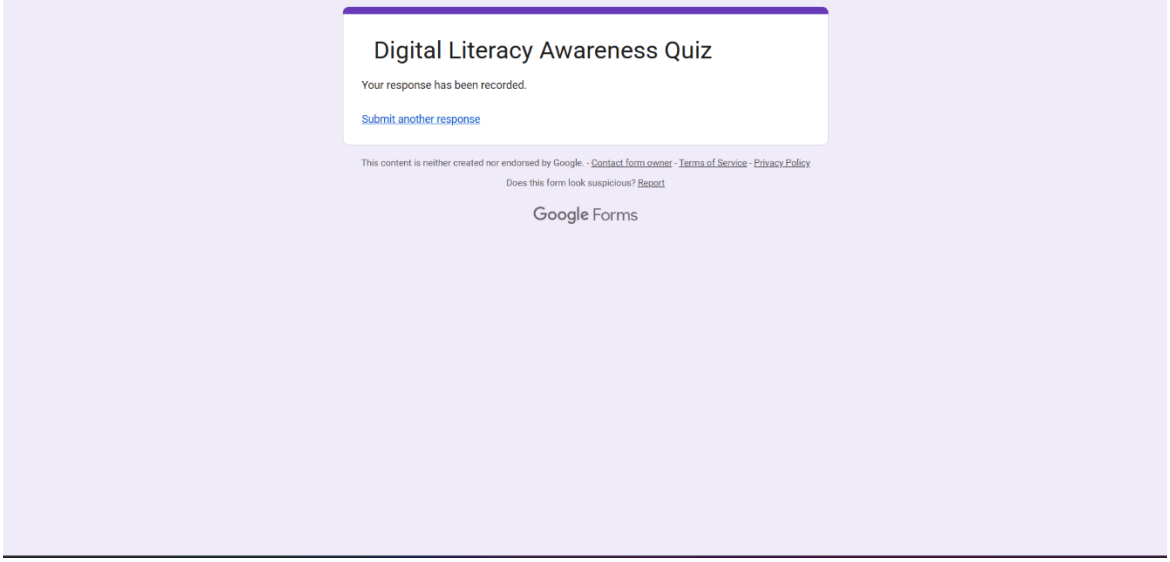


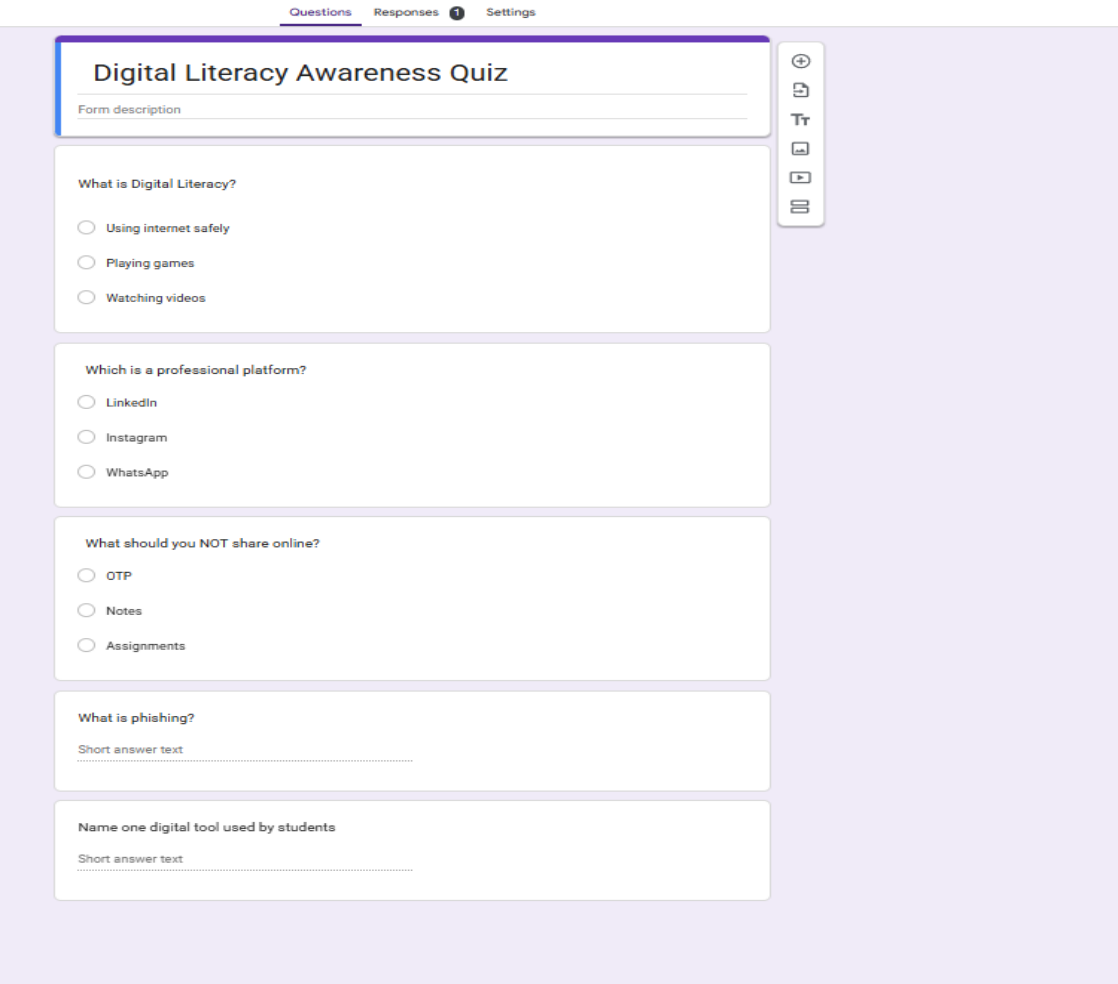
The activity has shown me the necessity for having a complete online career presence. I have discovered how useful GitHub and LinkedIn are in my overall career development.

Task 3 (Platforms)

I used HackerRank to work on an entry-level coding challenge. It provided me with experience as a novice in coding challenges as well as taught me basic problem-solving techniques. I also created a Google Form survey called Digital Literacy that will help determine the level of understanding amongst the student population regarding digital literacy. I found both tools to be extremely helpful for both learning and working together. HackerRank is a good way to begin developing your coding ability, while Google Forms is a great way to collect, analyze and make sense of that data once it has been collected.







Through this activity, I improved my ability to analyze problems and see how we can learn and work together using online resources.

Task 4 (Email)

I have gained knowledge about writing emails that meet the appropriate structure, tone, format, and formality in a professional environment. Poor communication may lead to unexpected or unintended consequences. For example, communicating in an informal manner when emailing your professor could be interpreted as an insult. By providing proper greetings, accurate subject lines, and polite language, you can avoid creating this type of misunderstanding.

```
Email 1 (Professor - Extension)

Subject: Deadline Extension

Dear Sir/Madam,

I hope that you're doing well. My name is Prakhar Anand and I am writing to request a short deadline extension for an assignment that is due Monday, 23/03/2026.

I have been working on the assignment; however, due to a number of unforeseen circumstances, I am unable to submit the assignment by the deadline.  Therefore, I would like to kindly ask you
for an extension so that I may turn in the assignment with the best quality possible.

Thank you for taking the time to consider my request; I look forward to hearing from you soon.

Sincerely,
Prakhar Anand

Email 2 (Internship)

Subject: Application for Summer Internship Opportunity

Dear Sir/Madam,

I am Prakhar Anand, currently enrolled as a first-year B.Tech student at VIT Bhopal and would like to consecutively submit my request for a place in your company's summer internship program.

Having never had an opportunity to gain first-hand experience in my field of study, I am eager to learn from professionals such as yourself and your team of talented employees. I would
greatly appreciate any consideration of my application.

Thank you very much for your consideration and time.

Best,
Prakhar Anand

```
SOCIAL MEDIA CHECKLIST

DOs and DONTs for using social media

1) DO: Be sure to use secure, complex passwords.
2) DO: Refrain from posting anything on your profile that is personal in nature.
3) DO: Research every piece of information before reposting it.
4) DO: Be considerate to those that you interact with via social media.
5) DO: Use the platform's privacy settings to protect your account.

1) DONT: Share your personal information (including your password or your OTP) to anyone.
2) DONT: Post inappropriate material.
3) DONT: Click on unknown links.
4) DONT: Distribute misinformation (i.e., false news).
5) DONT: Give away excessive personal information about yourself.
```

social-media-checklist.txt

Through this activity, I now see the value of using professional communication to prevent miscommunication and how having good etiquette in emails can help.

Task - 5

PART A: CASE STUDY

UPI (Unified Payments Interface) fraud is a type of cybercrime that is prevalent in India and involves criminals manipulating the UPI system to deceive people into making payments by requesting a fake payment. In the average case of UPI fraud, a victim receives a call or text message saying they are going to receive a large payment or reward, followed by a payment request from the fraudster, which the victim approves and enters their UPI PIN (personal identification number), resulting in the fraudster receiving the payment rather than the victim.

Students and people using UPI for the first time are usually the ones that are targeted for fraud, as they may not be totally familiar with the UPI system. The fraudsters may also impersonate bank officials and create fake customer service numbers to gain trust from potential victims.

Fraud resulting from UPI fraud may include financial loss, emotional distress, and lack of trust in using digital payment solutions. If a victim of UPI fraud does not report the fraud and take steps to recover their money quickly, it will likely be very difficult for them to get their money back.

The above example demonstrates the need for education, awareness and vigilance while using digital payment systems. It is important for users to understand that entering a PIN is pointless when they receive money, and therefore any request to do so likely indicates a scam.

PART B: PREVENTION CHECKLIST

Online Safety - Check List To Avoid Danger

1. Never Give Out Any OTP's Or UPI PIN #'s To Anyone
2. Always Confirm The UPI ID Prior To Making A Payment
3. Don't Click On Unknown Or Suspicious Links
4. Don't Accept Unknown Payment Requests
5. Always Use Trusted and Legitimate Applications For Transactions
6. Enable SMS & Application Alerts For All Transactions
7. Use Strong, Unique Passwords
8. Immediately Report Fraud

Report Cyber Crime At: https://www.cybercrime.gov.in

Cyber Crime Helpline: 1930

The activity also alerted me to the importance of being aware of online threats and the need to be cautious while using online checkout systems.

Conclusion

In conclusion I learned that digital literacy is essential in today's society. I learned to utilize digital tools effectively, create an online professional portfolio to present myself appropriately online, communicate in a professional manner as well as secure yourself while using the internet. These skills will assist me both academically and professionally for many years to come.
